My DRZ is a 2000 E, Keihin. I live at 7,000. During summer the bike will be expected to run OK as high as 12,000 feet. I'm not sure how it's jetted right now, just got it. I'm under the impression it's running pretty lean, even for this high. Exhaust is pretty hot, needs choke to cold start even when it's 70 degrees outside.
