Epidemiology is the study of the distribution, determinants and control of illness and impairment in human populations. It is the cornerstone of population health, and informs policy decisions and evidence-based medicine by identifying risk factors for disease and targets for treatment and prevention.

Epidemiology - HRP - Stanford University School of Medicine

Epidemiology, branch of medical science that studies the distribution of disease in human populations and the factors determining that distribution, chiefly by the use of statistics. Unlike other medical disciplines, epidemiology concerns itself with groups of people rather than individual patients
