Archaeology and the Study of Africa - African Studies ...

The topic of early iron-metallurgy in sub-Saharan Africa encompasses both studies of the technology and archaeology of indigenous iron-production. Some evidence from historical linguistics suggests that the Nok culture of Nigeria may have practiced iron smelting from as early as 1000 BC; archaeological evidence dates this not later than 550 BC. Evidence also exists for earlier iron metallurgy in parts Nigeria, Cameroon, and Central Africa, possibly from as early as around 2,000 BC. The nearby Dj

Iron metallurgy in Africa - Wikipedia

1st century CE: Iron smelting in southern and eastern Africa (Buhaya, Urewe) 2nd century CE: Heyday of Roman control of North Africa. 2nd century CE: Widespread iron smelting in southern and eastern Africa (Bosutswe, Toutswe, Lydenberg. 639 CE: Arab invasion of Egypt.

The archaeology of the indigenous west African town is a sparsely populated field of enquiry, especially compared with the vast numbers of researchers involved in early urban phenomena elsewhere in the world. Part of the reason for this probably lies in the unimposing visual aspect of many early west African towns.

Found: Possible Pre-Flood Artifacts - The New York Times

Africa was never totally isolated from the rest of the world, but the circum-navigation and European interference shifted the fate of the whole continent. Introduction The archaeology of Africa is synonymous with the archaeology of humankind. Remarkably, in Africa archaeological research is the product of all existing academic traditions.
