The "ULTIMATE" Racing Car Chassis Setup Guide and Tutorial

Setup Balance Planning. A balanced setup is not only one that causes the car to be neutral in handling. More importantly, it is a setup that causes all four wheels to work their hardest. It comes from choosing the spring rates, Moment Centers, and load distribution that causes the loading on all four tires to be the most possible.

Team45 Racetech Chassis Super Late Model

What separates dirt cars from asphalt race cars, aside from the obvious, is the fact that grip on dirt tracks is constantly changing. That presents a huge problem. What many don't understand is that dirt Late Models and Modifieds are often setup much like asphalt Late Models and asphalt Modifieds when the track has a lot of grip.
