More. Investment is no longer a matter of individual savers directly choosing which shares or bonds to buy. Rather, most of their money flows through a [chain]: an often extended sequence of intermediaries. What goes on in that chain is of huge importance: the world's investment managers, who are now almost as well paid as top bankers, control assets equivalent in value to around a year of total global economic output.

Chains of Finance: How Investment Management is Shaped ...  
In Chains of Finance, five social scientists discuss the ways in which the intermediaries in the chain influence each other, channel the flows of savers' money, enhance investment decisions, and form audiences for each other's performances of financially competent selves. The central argument of the book is that investment management is fashioned profoundly by the opportunities and constraints this chain creates.

More recently some in the fund management industry have sought to delegate responsibility for short-term pressure on companies further back down the investment chain to their clients. Fund managers only pressure companies for short-term performance, it is argued, because they themselves are being judged by pension funds and their advisers on their quarterly relative performance.
