as Genetic Change 16.3 The Process of Speciation Evolutionary thought today is tightly linked to genetics. Remember, populations, not individuals evolve. All the alleles in a pop. added together are called the gene pool .

Chapter 16: Evolution of Populations

Chapter 16 Evolution of Populations
16-1 Genes and Variation Darwin's original ideas can now be understood in genetic terms. Beginning with variation, we now know that traits are controlled by genes and that many genes have at least two forms, or alleles. We also know that individuals of all species are heterozygous for many genes.
