Engineering Economics 4-1 Cash Flow Cash flow is the sum of money recorded as receipts or disbursements in a project's financial records. A cash flow diagram presents the flow of cash as arrows on a time line scaled to the magnitude of the cash flow, where expenses are down arrows and receipts are up arrows. Year-end convention ~ expenses

*Engineering Economics Lecture - MIT OpenCourseWare*

Chemical engineering is a branch of engineering that uses principles of chemistry, physics, mathematics, biology, and economics to efficiently use, produce, design, transport and transform energy and materials. The work of chemical engineers can range from the utilisation of nano-technology and nano-materials in the laboratory to large-scale industrial processes that convert chemicals, raw ...

## *Chemical Engineering Economics | D.E. Garrett | Springer*

This broad list of chemical prices is taken from the 28 August 2006 issue of Chemical Market Reporter (now rebranded and incorporated into ICIS Chemical Business). The list consists of static price indications from that issue. CMR published such a list in its weekly issues until 2006.

## *Chemical Engineering Design | ScienceDirect*

Measures of economic return are vital in the design phase of an engineering project. Companies will perform simulations to project capital and operating cost expenditures along with revenue generation, and use the resulting data to perform economic analyses, such as NPV, payback period, or discounted cash flow analysis. Based on the results of ...
