Climate Code Red The Case

" Climate Code Red applies an uncommon degree of common-sense to the latest climate science, and is a well-researched basis for building a truly meaningful response. It makes it abundantly clear that greenhouse-gas emissions have to stop entirely, and that even this must sit in a larger plan to manage our destabilised earth-atmosphere system."

Climate Code Red: the case for emergency action: Spratt

...

Philip Sutton and I used this language almost 12 years ago in the book "Climate Code Red", and we have witnessed a recent mass engagement in this idea, including climate emergency declarations by more than 1200 councils around the world, the Oxford Dictionary naming "climate emergency" its word of the year, the resolution last week by ...

...

Climate Code Red: The Case for Emergency Action is a 2008 book which presents scientific evidence that the global warming crisis is worse than official reports and national governments have so far indicated. The book argues that we are facing a "sustainability emergency" that requires a clear break from business-as-usual politics. The authors explain that emergency action to address climate change is not so much a radical idea as

Climate Code Red - Wikipedia

But the best-case climate scenarios — those assuming the least amount of warming — are almost certainly not going to happen”, reported E&E News. Carbon Brief reported that “the silver lining to this cloud is that our findings also suggest that very high Equilibrium Climate Sensitivity (ECS - see below) estimates are unlikely”.
