Clinical Pharmacology & Therapeutics (CPT) is the flagship journal of the American Society for Clinical Pharmacology and Therapeutics (ASCPT). Featured in Clinical Pharmacology & Therapeutics

Clinical Pharmacology & Therapeutics - Wiley Online Library

Propofol is an intravenous hypnotic drug that is used for induction and maintenance of sedation and general anaesthesia. It exerts its effects through potentiation of the inhibitory neurotransmitter γ -aminobutyric acid (GABA) at the GABA A receptor, and has gained widespread use due to its favourable drug effect profile. The main adverse effects are disturbances in cardiopulmonary physiology.

Clinical Pharmacokinetics and Pharmacodynamics of Propofol

Drug Metabolism and Pharmacokinetics (DMPK) is an official online journal of the Japanese Society for the Study of Xenobiotics (JSSX), and it replaces the JSSX's former journal, Xenobiotic Metabolism and Disposition. The journal will accept original submissions in English on the understanding that the work is unpublished and is not being considered for publication elsewhere.

Drug Metabolism and Pharmacokinetics - Journal - Elsevier

The European Journal of Pharmacology publishes research papers covering all aspects of experimental pharmacology with focus on the mechanism of action of structurally identified compounds affecting biological systems.

European Journal of Pharmacology - Elsevier

α β -Thalassemia is an inherited blood disorder characterized by reduced or no production of adult hemoglobin. Systematic identification of the burden of β -thalassemia with contemporary treatments is lacking in published literature. Thus, a gap exists in understanding the baseline burden on which to assess future treatments.
