Moore has written an engaging and thoughtful new book, Common Ground on Hostile Turf: Stories from an Environmental Mediator (Island Press, 2013), in which she describes her work and, better yet, teases out some of the lessons she has learned about getting people with sometimes radically different backgrounds and perspectives to come together ...

What Managers Can Learn from Mediators

As another New York Times columnist, food activist Mark Bittman, observes, "many common lawn chemicals are banned in other countries, because most if not all are toxic in a variety of ways." All of which made me wonder: Why can't we have it both ways? Surely we can find a legal - and sustainable - common ground.

Pesticides are toxic chemicals that are both ubiquitous and unique. Unlike other toxic chemicals, they are designed to kill, repel, or otherwise harm living organisms [U.S. Environmental Protection Agency (EPA) 2005c], and they are one of the few toxic substances that are intentionally applied to the environment [National Research Council (NRC) 1993].
