Coping Inventory for Stressful Situations
The CISS:SSC form is a 21-item measure for adults. The instructions are modified such that responses are given with a designated stressful situation in mind. Norms are given for situations involving social evaluation, change in social situation, relationship or interpersonal conflict, and general stress.

The Coping Inventory is a measure of adaptive behavior. It comes in two forms. For assessment of 3-16 year olds there is an Observation Form and for 15 years and older there is a Self-Rated Form. The Observation Form assesses the behavior patterns and skills employed to meet personal needs and adapt to environmental demands.
