Contrary to the current evolutionary theory that dogs are the same species as wolves, the authors postulate a common (archaic) ancestor for domestic dogs and wolves. Building on the work of earlier ethologists, they assert that modern dogs and modern wolves are as distinct from each other as modern humans are from modern apes.

A Talk with Ray & Lorna Coppinger. Authors of Dogs: A Startling New Understanding. of Canine Origin, Behavior & Evolution. USE. Book Search. P eople have speculated on the origins of the dog for centuries, with the most common view that people took wolf pups from their dens and tamed them, thus creating the domestic dog or Canis familiaris. Ray and Lorna Coppinger, biologists and dog trainers, offer a very different view, suggesting that dogs evolved to fill a new niche created when people ...
