A common trend in the Industrial Automation and Robotics industries is that people are looking for electric alternatives to their pneumatic components. This can be seen with – but not limited to – electric robotic grippers, electromechanical cylinders, and linear actuators. Many of the pneumatic manufacturers (SMC, Festo, Bimba) are starting to venture into the world of electromechanical ...

Electromechanics - Wikipedia

In very simple words, the systems which control the motion of the electrical machines, are known as electrical drives. A typical drive system is assembled with a electric motor (may be several) and a sophisticated control system that controls the rotation of the motor shaft. Now days, this control can be done easily with the help of software.
