This temperature sensor, also known as a thermistor, is used for refrigerators and freezers. The sensor sends the temperature reading of the refrigerator towards the control board. If your refrigerator or freezer runs too long, is too warm, will not defrost, or has sections that are too cold, replacing this part is the solution.

Rated 5 out of 5 by JackJackJackaroo from Great fridge -- nicely designed, nicely assembled This is a replacement fridge for us, in use about a month or so now, after our 2001 top-freezer fridge died. This GE fridge looks clean and sleek, and the smudge resistant finish is an absolute necessity, especially with kids. The look inside is nice as well, with good lighting.
