Grand Marquis Eatc Repair

This is a Mercury EATC electronic automatic temperature control repair service that rebuilds a Mercury EATC on 1995 and newer Mercury Grand Marquis, Mountaineer, and Marauder vehicles. This repair service corrects a common issue with the EATC that causes air to blow out of the wrong vents and/or the defrost. Note: Our repair service is only for the module that has the thumb wheel fan speed control.

Mercury Electronic Automatic Temperature Control Repair

Ford EATC Repair. The Electronic Automatic Temperature Control (EATC) module used in Mercury Marauders, Grand Marquis, Crown Victorias, Town Cars, F-series trucks, and numerous other Ford vehicles are essentially the same, with some minor functional and cosmetic differences, but they are the same inside. When the o-rings fail, the default setting allows air to only exit through the defrost vents.

The EATC module self-test will detect concerns in the system control functions and will display hard diagnostic trouble codes (DTCs) in addition to intermittent diagnostic trouble codes for concerns that occur during system operation. The vehicle interior temperature should be between 4°-32°C (40-90°F) when carrying out the self-test.

Ford EATC Self Diagnostics - IDMsvc

I ordered these with next-day shipping so I could repair a vacuum leak in my 2004 Mercury Grand Marquis EATC (electronic automatic temperature control) unit. There is a common problem where the rubber o-rings will fail, causing a vacuum leak and letting all of the air blow out the defrost vent regardless of the setting.
