*Gravity Force Lab - PhET Interactive Simulations*

The downward force of gravity on both bags is the same, but the upward force of air resistance on the crumpled bag is less. As a result, the net downward force on the crumpled bag is greater, as shown in Figure 9. The amount of air resistance on an object depends on the speed, size, and shape of the object.

*Answer Key Forces Unit Test Flashcards | Quizlet*

Gravity is one of four physical forces in nature that shape the universe. These forces include strong nuclear forces, weak nuclear forces and electromagnetic forces. The force of gravity has an infinite range. It is the pull of two bodies of matter that brings them closer together.

*Connecting Motion with Forces - Quia*

The answer is gravity. Gravity is a force of attraction between objects that is due to their masses. The force of gravity can change the motion of an object by changing its speed, direction, or both. In this section, you will learn about gravity and its effects on objects, such as astronauts in space.

Need extra help? Check out [www.bayhicoach.com](http://www.bayhicoach.com) Hour: \_\_\_\_ Gravity—A Familiar Force Use with Text Pages 83-86. Write answers to the following questions on the blank lines provided. 1. What is gravity? \_\_\_\_ 2. What are two things that the amount of gravitational force between two objects depends on?

*Is gravity a force? | Yahoo Answers*

Answer and Explanation: By definition, force is the product of the mass of an object and acceleration of an object. Furthermore, the gravitational field is defined as the acceleration due to the...

*Chapter 3: Forces*

1. Gravity is a force that can be changed. T/F 2. The more mass an object is, the smaller the force of gravity. T/F 3. As one object gets closer to another object, the force of gravity will increase. T/F 4. The Sun has a greater gravitational force than Jupiter. T/F Circle the Correct Answer

*Study Guide and Reinforce Answers*

Explain why the Earth orbits the Sun (you must use both the terms gravity and inertia in your answer). Earth is an object in motion so according to Newton the Earth would keep travelling forward forever until it runs into another object or is disturbed by an unbalanced force. The Sun's gravity provides that unbalanced force.

*Gravity Force Simulation Activity.docx*

the force of gravity on an object. Orbit - elliptical path of one body (ex. - the Moon) follows around another body (ex - the Earth) due to the influence of gravity. Microgravity - A space ship in orbit is in a free fall. Gravity is acting on the ship and astronauts. The ship and astronauts are falling around Earth at the same rate.

Unit III Force & Motion (Newton's Laws) Gravity - A Familiar Force Page 2. Gravity—A Familiar Force In the blank at the left, write the letter of the term that correctly completes each statement. \_\_\_\_ 1. Every object in the universe exerts a force on every other object.

*Is gravity a force - Answers*

A(n) \_\_ is a push or pull one body exerts on another body. A(n) \_\_ on an object always changes the velocity of the object. Forces that are equal in size and opposite in directions are called. The tendency of an object to resist any change in its motion is called.

*Grades 6, 7 and 8 | Science | Middle School | Gravity*

IMO, gravity is a FIELD that gives rise to the force we call WEIGHT (or the "gravitational force"). The units for gravity in the metric system are  $m/s^2$  or  $N/kg$ .

*Determination of the Force of Gravity - EduPage*

Start studying Answer Key Forces Unit Test. Learn vocabulary, terms, and more with flashcards, games, and other study tools. Search. ... The overall force on an object when all the individual forces acting on it are added together. ... The force of gravity on an object that the surface of a planet.

*III - bayhicoach.com*

2nd answer: The force that pulls all objects toward each other is gravity. The earth exerts the force of gravity on you, and you exert the force of gravity on the earth ( or your couch, dog, etc).

*Gravity: A Force of Attraction Flashcards | Quizlet*

Answers will vary. Examples might include fingers on pencil; body on chair; feet on floor; atmosphere on body. 3. The direction of the motion will change in the direction of the force. 4. It is the net force. 5. The forces are balanced. 6. The forces acting on the rock are not balanced; the net force is not zero. 7. It is the velocity of a falling object when the
