How Grammaticalization Processes Create Grammar
In historical linguistics and discourse analysis, grammaticalization is a type of semantic change by which (a) a lexical item or construction changes into one that serves a grammatical function, or (b) a grammatical item develops a new grammatical function.

Definition and Examples of Grammaticalization
In the process of grammaticalization, an uninflected lexical word (or content word) is transformed into a grammar word (or function word). The process by which the word leaves its word class and enters another is not sudden, but occurs by a gradual series of individual shifts.

Grammaticalization - Wikipedia
How grammaticalization processes create grammar: From In historical linguistics and language change, grammaticalization is a process of language change by which words representing objects and actions become grammatical markers.

How Grammaticalization Processes Create Grammar
This article examines the relation between grammaticalisation and generative grammar. It describes the generative attitude towards historical linguistics in general and then to grammaticalisation in particular and describes what the locus of change is in a generative model. It reviews some early work on historical linguistics within generative grammar.

Grammaticalization and generative grammar: a difficult ...
Introduction. In its broadest sense, grammaticalization, also known as grammaticization, is the process by which grammar is created (Cro 2006: 366), Wor the study of this process. The term is thought to have originated with Meillet (W958, but rst published W9 W2) who was interested in identifying how new categories and sys- tem changes arise.

LuraghiS 15 Fpp
Reduced to its essentials, grammaticalization theory begins with the observation that grammatical

morphemes develop gradually out of lexical morphemes or combinations of lexical morphemes with lexical or grammatical morphemes (Bybee, Perkins & Pagliuca 1994: 4).

Grammaticalization, constructions and the incremental ...

It attempts a terminological clarification of both terms independently from each other and examines their mutual relations. It proposes the hypothesis that fundamental features of grammar itself are rooted in pragmatics, and that therefore there is reason to interpret pragmaticalisation as an integral part of grammaticalisation.
