limited) warning and are among the most destructive natural disasters. To ride out an earthquake, remember the phrase "drop, cover, and hold on." Quickly find a spot away from glass, exterior walls, and...

## **5 Ways to Survive an Earthquake - wikiHow**

Using your compass, draw a circle with a radius equal to the number you came up with in Step #2 (the radius is the distance from the center of a circle to its edge). The center of the circle will be the location of your seismograph. The epicenter of the earthquake is somewhere on the edge of that circle. 4.
