~~IEC 60364 5 52 | Electrical Conductor | Electricity~~

The resistance is calculated according to Annex G in IEC 60364-5-52 as $(R_c = \frac{0.0225 \cdot L}{s})$, where s is the cross-sectional area of the conductors in mm², and L is the length of the conductor in meters. A reactance (X_c) of 0.08 mΩ/m is used for all cables, according to Annex G in IEC 60364-5-52. Short circuit calculation

~~31. KS C IEC 60364 5 52 B) : B~~

The IEC publishes international standards, technical guides and reports which are the bases or, in any case, a reference of utmost importance for any national and European standardization activity. IEC Standards are generally issued in two languages: English and French. In 1991 the IEC has ratified co-operation agreements with CENELEC (European
