is written by internationally respected scientist/author, John Hudson Tiner, who applies the vignette approach, which effectively draws readers into the text and holds attention. The author and editors have deliberately avoided complex mathematical equations in order to entice students into high school level science.

I was particularly interested in reviewing this course since it was written by John Hudson Tiner, author of the “Exploring” series of books that I thought were especially well written. In my opinion, Tiner’s writing style proves to be critical in Integrated Physics & Chemistry. He takes two subjects that are often presented as dry collections of
