To show the language is in NP, guess z , compute $f(z)$ deterministically in polynomial time, and test whether $f(z) = x$. When the guess of z is correct, we have $f^{-1}(x)$. Compare it with y , and accept the pair (x,y) if $z = y$.

Automata Theory Introduction Automata

- What is it? The term "Automata" is derived from the Greek word "αὐτόματα" which means "self-acting".

An automaton (Automata in plural) is an abstract self-propelled computing device which follows a predetermined sequence of operations automatically.

Originally, CFGs were used in the study of the human languages. Cellular automata are used in the field of biology, the most common example being John Conway's Game of Life. Some other examples which could be explained using automata theory in biology include mollusk and pine cones growth and pigmentation patterns.
