Ip Routing On Cisco Ios

IP Routing. Cisco IP Routing Protocols provide the fundamental infrastructure for the delivery of advanced IP services across all Cisco networking products. Whether based on Internet Engineering Task Force (IETF) standards or Cisco innovations, Cisco offers the broadest portfolio of IP routing technologies.

IP Routing - Cisco

By default, the Cisco software validates the source IP address of incoming Routing Information Protocol (RIP) routing updates. If the source address is not valid, the software discards the routing update. You must disable this functionality if you want to receive updates from a device that is not part of this network.

IP Routing: RIP Configuration Guide, Cisco IOS Release 15M ...

EIGRP Stub Routing. When configuring the distribution device to send only a default route to the remote device, you must use the ip classless command on the remote device. By default, the ip classless command is enabled in all Cisco images that support the EIGRP stub routing feature.

IP Routing: EIGRP Configuration Guide, Cisco IOS Release ...

Prerequisites for Basic IP Multicast Routing. The switch populates its multicast routing table and forwards multicast packets it receives from its directly connected LANs according to the mode setting. You can configure an interface to be in the PIM dense mode, sparse mode, or sparse-dense mode.

The IP base is for the Standard Multilayer Software Image (SMI) switches, and the IP services image is for the Enhanced Standard Multilayer Software Image (EMI) switches in Cisco IOS Software Release 12.2(25)SEB and later.

What is the difference between an IP ba... - Cisco Community

I have a Cisco 3850 which runs IOS XE and the issue is that when I'm disabling routing with no ip routing command and configure management SVI with ip default-gateway the switch still shows in the output of show ip route connected and static routes.. I expect not to see this output. To be honest this is my first experience with IOS XE so maybe I'm missing something.
