jQuery: The Write Less, Do More, JavaScript Library. Ajax. Call a local script on the server /api/getWeather with the query parameter zipcode=97201 and replace the element #weather-temp's html with the returned text.

jQuery

This method is a shortcut for .on("click", handler) in the first two variations, and .trigger("click") in the third. The click event is sent to an element when the mouse pointer is over the element, and the mouse button is pressed and released. Any HTML element can receive this event. For example, consider the HTML:
