Hiv And Old

FAST FACTS

Antiretroviral therapy (ART) means that many people living with HIV are staying healthy into old age. People living with HIV may be more likely to develop certain age-related illnesses earlier than people who are HIV-negative. Some people experience side effects when taking treatment long-term.

Growing older and

HIV/AIDS | CDC

The fewer CD4 T cells you have, the weaker your immune system becomes. You can have an HIV infection, with few or no symptoms, for years before it turns into AIDS. AIDS is diagnosed when the CD4 T cell count falls below 200 or you have an AIDS -defining complication, such as a serious infection or cancer.
