Application software uses the computer system to perform useful work or provide entertainment functions beyond the basic operation of the computer itself. System software is designed to operate the computer hardware, to provide basic functionality, and to provide a platform for running application software. System software includes:

~~How to Set Up Your New Laptop Like a Pro: Out of the Box Tips~~

Place the bottom part of the laptop on the table/desk you are sitting in front of. They're called "laptops" because they can go on your lap, but that doesn't mean that it's always the best or right place. Try to find a comfortable angle for your wrists and hands - this might mean moving the laptop around until you find the best position for you.
