below you will find the biology powerpoints shown in class. all the texts will be available, but the visual concepts will not. remember: you always have the power of the internet to find further visual reinforcements for all the topics we cover. in the coming weeks, i will add links to various videos to assist you in this exploration.

~~Biology PowerPoints and Documents - Mr. Harris Science~~

Protists are a group made up of protozoa, unicellular algae and slime molds. Protozoa are the oldest known group of heterotrophic life-that consume and transforms complex food particles into energy. Although protozoans are only made up of a single cell these organisms manage to perform all the basic tasks of life.
