And, in case you really want MOLLE on your backpack, you can DIY the straps with a bit of sewing knowledge: MOLLE grid system uses horizontal rows of 1" Mil-W-43668 Type III nylon webbing (you can try to find Type IIIa), spaced 1" apart, and reattached to the backing at 1.5" intervals. Some people love them:

MOLLE II With External Sleep System. lets just call this one the Medium MOLLE II pack – desert camo, external sleep system compartment, claymore pouch on outside, no internal pouches or compartments, plastic frame, map case in top flap – but has plastic on one side of the map case so you can see the map without having to take the map out.

Medium MOLLE vs. Medium ALICE - AllOutdoor.com

Over the last twenty years I've served in two Armies, as a PMC and in a Guerrilla group, working in jungle, urban and desert environments as well as working overseas on security tasks. I started out in the NZ Army in the mid 90's using the issued ALICE webbing and pack. The metal clips on the webbing and the rivet in the middle of the pack frame would rub me raw on pack marches.

The Military MOLLE II rucksack is a beast, and one of our favorite rucksacks. The material is made from 1000D nylon, this is important as it makes this rucksack abrasion resistant while also making it water repellent.. The main compartment alone is capable of carrying 60 lbs (with the additional compartments and side pouches, you can carry up to 100lbs of weight) and is 4,000 cubic inches ...

The MOLLE II gear I wore in 2003-2004 is different than what is worn today. There are improvements in not only the design of the carrier (vest) but also in the pouches issued and the backpack. Besides the butt-ugly, non-functional (IMHO) UCP, it was also initially issued in woodland and 3-color desert patterns.

MOLLE II is 4000 ci for the main pouch + 500 ea for the two sustainment pouches for a total of 5000 ci The last MOLLE 4000 was ~ 3600 CI for the main, plus the remainder in the outside pouch, so it is in fact a tad smaller.

MOLLE ii vs FILBE. CM Community Member. I recently picked up a used FILBE ruck to be used to carry bear barrels. It fits a 30 litre just, it's about 15" across. Does anyone know if the MOLLE ii ruck opens a bit wider? I really don't like ACU but for what they're going for it's hard to ignore.

The MOLLE on the other hand, will be loved by hikers and campers alike who will most enjoy the light weight of the pack. The streamlined design is good for most hikers, especially for short trips. A hydration pouch means the hiker will not have to carry an extra water bottle and the straps allow the user to add small items without adding much to the bulk.

Far as I can tell, the only way to make the older MOLLE II shoulders work on the 1609 U shaped frame is to utilize the load lifter straps into the loops of the Medium pack, and the 1.5" vertical strap to the U frame's slot in the middle, because theres no easy way to thread the 4 horizontal straps to the horns without using a spreader bar.

When you say Molle II, does that mean USGI MOLLE II? If so I would go with that. The MOLLE Assault pack is okay, but the Medium Assault pack is very comfortable, and if you go with the large Rucksack it can carry over a 100lbs and it's also comfortable. Also the Large Rucksack is cheap. On ebay for around \$80.00.
