Multilevel and Longitudinal Modeling Using Stata, Second Edition, by Sophia Rabe-Hesketh and Anders Skrondal, looks specifically at Stata's treatment of generalized linear mixed models, also known as multilevel or hierarchical models.

~~Multilevel and Longitudinal Modeling with IBM SPSS ...~~

This book demonstrates how to use multilevel and longitudinal modeling techniques available in the IBM SPSS mixed-effects program (MIXED). Annotated screen shots provide readers with a step-by-step understanding of each technique and navigating the program.

Multilevel and Longitudinal Modeling Using Stata, Third Edition, by Sophia Rabe-Hesketh and Anders Skrondal, looks specifically at Stata's treatment of generalized linear mixed models, also known as multilevel or hierarchical models. These models are mixed because they allow fixed and random effects, and they are generalized because they are appropriate for continuous Gaussian responses as ...

Analyzing Longitudinal Data with Multilevel Models: An Example with Individuals Living with Lower Extremity Intra-articular Fractures. Oi-Man Kwok, Andrea T. Underhill, Jack W. Berry, ... A. Random Intercept Model and Simple Linear Growth Model. In multilevel models for longitudinal data, the lowest level of data is the specific measurement at ...

~~Multilevel Models for Longitudinal Data - www.bristol.ac.uk~~

One application of multilevel modeling (MLM) is the analysis of repeated measures data. Multilevel modeling for repeated measures data is most often discussed in the context of modeling change over time (i.e. growth curve modeling for longitudinal designs); however, it may also be used for repeated measures data in which time is not a factor.

~~Two-level multilevel model using SPSS (chapter 3 v1)~~

Multilevel models (also known as hierarchical linear models, nested data models, mixed models, random coefficient, random-effects models, random parameter models, or split-plot designs) are statistical models of parameters that vary at more than one level. An example could be a model of student performance that contains measures for individual students as well as measures for classrooms within ...

In my last posting, I introduced you to the concepts of hierarchical or "multilevel" data.In today's post, I'd like to show you how to use multilevel modeling techniques to analyse longitudinal data with Stata's xtmixed command.. Last time, we noticed that our data had two features.

Longitudinal Research Questions and Models Consider multilevel models for: Change over time Growth curve (latent trajectory) models E.g. Do child developmental processes (academic ability, behaviour etc.) differ for boys and girls, or by parental characteristics? Dynamic (autoregressive) models E.g. Is there a causal effect of test score at time ...
