by the Nematicide Stewardship Programme and has been recognised by the Red Tractor Initiative. DuPont believes that nearly all Vydate ®10G users are now enrolled in the programme and as such will receive regular updates on the use of Vydate ®10G, invitations to stewardship workshops and on farm support services.

Nematicide stewardship launched | Farmers Guide

DuPont™ Vydate® C-LV insecticide/nematicide is the only systemic foliar application to cost-effectively deliver nematode control for healthier cotton plants and an opportunity to maximize yield and quality to increase profitability.

Nematicide Stewardship Dupont

Nematicide Stewardship Programme Nematode control is integral to the production of high quality, nutritious root crops and granular nematicides are a vital tool in an integrated strategy to control this pest.

The Nematicide Stewardship Programme—NSP

DuPont supports nematicide stewardship and the correct use of @Vydate 10G by providing training workshops for operators, BASIS advisors and farm managers as well undertaking an extensive on-farm programme of granular equipment calibrations, ensuring that the correct application rates are applied.

Vydate® 10G | Corteva Agriscience

DuPont accepts no liability for any losses that may result from the failure of this product to control resistant insects. DuPont™ Vydate® L may be subject to specific resistance management strategies. For further information contact your local supplier, DuPont representative or local agricultural department agronomist.

DuPont™ Vydate® L Insecticide/nematicide SDS Australia

New Nematicide Stewardship Programme (NSP) guidelines are essential for these pesticides to have a sustainable future. This is one of the key messages that the newly-formed Nematicide Stewardship Programme (NSP) group is keen to highlight to the potato industry and to European regulators.

NSP News—The Nematicide Stewardship Programme

Vydate® Stewardship Programme Corteva Agriscience™ promotes effective stewardship throughout its product range, from product manufacture through to final use and beyond. Stewardship supports sustainable agriculture, helps to maintain the environment and safeguards user and public health.
