Reflection. This area of Physics is frequently considered to be 'easy' and 'straightforward', this is because we are familiar with what we see in the mirror - the image seen (often) as we expect; and we use mirrors daily. "Light travels in straight lines" - this is a statement you will be familiar with since the KS3. Well if we ...

Reflection and Refraction : Educating Physics

Examples of reflection are light waves striking a mirror or echoes in which sound waves are reflected of a solid surface. When waves undergo reflection the angle the incoming waves make with the surface is equal to the angle of the reflected waves. This is the Law of Reflection and can be written as:
