Polymorphism in Pharmaceutical Solids, Second Edition ...

In materials science, polymorphism is the ability of a solid material to exist in more than one form or crystal structure. Polymorphism can potentially be found in any crystalline material including polymers, minerals, and metals, and is related to allotropy, which refers to chemical elements. The complete morphology of a material is described by polymorphism and other variables such as crystal ...

Solids produced were vacuum filtered at once and oven dried at 40 °C for 4 h. DSC and thermogravimetric analysis (TGA) were used mainly to determine the polymorphism of sulfathiazole solid samples. Optical microscopy (OM) was used for crystal-habit imaging. Materials and methods. Active pharmaceutical ingredient.
