Magnetic Loop Antenna

This antenna is a small (transmitting) loop, so there are no taps on coils and no counterpoise wires needed. It has a built in tuner with a 6:1 reduction drive that allows you to easily match the antenna for transmit and receive from 7 MHz to 29.7 MHz or 3.5 MHz to 7

principle: It is now a folded dipole.
Actually, the feed point of the folded dipole is on the top and the actual legs are composed of the coax ground.
