~~ATSAMC21J18A 32-bit Microcontrollers~~

Hi All, I designed a custom circuit using SAMD21G18A. I programmed it using Atmel ICE. It programs successfully, but nothing executes after that. I debugged the board almost 1 week. VDD, VSS, Reset, RTC is connected correctly. What can b...

~~SparkFun Electronics~~

Arduino Zero is a simple and powerful 32-bit extension of the platform established by the UNO. This board aims to provide a platform for innovative projects in smart IoT devices, wearable technology, high-tech automation, crazy robotics, and much more.

Arduino Core for SAMD21 CPU. This repository contains the source code and configuration files of the Arduino Core for Atmel's SAMD21 processor (used on the Arduino/Genuino Zero, MKR1000 and MKRZero boards). Installation on Arduino IDE. This core is available as a package in the Arduino IDE cores manager.

The Microchip SAM C series of 5V Cortex M0+ devices is designed for industrial and commercial applications in noisy environments. These products feature robust communications peripherals including the SERCOM module and CAN-FD, along with advanced motor control peripherals, and the Peripheral Touch Control (PTC) for developing robust user interfaces.
