The Ultimate Car Seat Guide

Rear-facing seats should be installed in the back seat of your vehicle. Never place a rear-facing seat in front of an active passenger frontal air bag. The center seating position is ideal if it can be used, since it is the farthest from any point of impact. The seat should be installed using either the LATCH system or vehicle safety belt, never both.

Car Seat Guide | AAA Exchange

To maximize safety, keep your child in the car seat for as long as possible, as long as the child fits within the manufacturer's height and weight requirements. Keep your child in the back seat at least through age 12. Recommended car seats based on your child's age and size

Car Seats and Booster Seats | NHTSA

Infants and toddlers should ride in a rear-facing car seat (infant-only rear-facing car seat or rear-facing convertible car seat) until they are 2 years old or until they have reached the weight and height limits of their car seat. Although this means that some larger infants and toddlers might have to

graduate to a rear-facing convertible car seat, there are several models of infant-only seats with higher, 30- to 35-pound weight limits that should get you to the next car seat safety milestone.

American Academy of Pediatrics Car Seat Guidelines

As a CPS technician, you will put your knowledge to work through a variety of activities, including community presentations and/or child safety seat checks where parents and caregivers receive education and hands-on assistance with the proper use of child restraint systems and seat belts. A majority of parents still misuse their child restraints and need help to get it right.

Welcome! | National CPS Certification

The CPS Certification Course is usually three to four days long and combines classroom instruction, indoor and outdoor hands-on activities, skills assessments with car seats and vehicles, and a community safety seat checkup event. You will receive a copy of the technician guide and will be expected to read it as part of the course instruction.
