The square of an odd number is an odd number. Problem 8: Show that the product of an odd number and an even number is an even number. Solution Let $2m + 1$ be the odd number and $2n$ be the even number. The product is given by $(2m + 1)(2n) = 4mn + 2n = 2(2mn + n)$ Let $N = 2mn + n$ and write the product as $(2m + 1)(2n) = 2N$ The product of an odd number and an even number is an even number. Exercises: Complete using the word even or the word odd. 1. The product of two odd numbers is . . . 2 . . .
