Step 2: Visit the normal probability area index and find a picture that looks like your graph. Follow the instructions on that page to find the z-value for the graph. The z-value is the probability.. Tip: Step 1 is technically optional, but it's always a good idea to sketch a graph when you're trying to answer probability word problems. That's because most mistakes happen not because you ...

Find the probability. This problem requires us to find the probability that p_1 is less than p_2 . This is equivalent to finding the probability that $p_1 - p_2$ is less than zero. To find this probability, we need to transform the random variable ($p_1 - p_2$) into a z-score. That transformation appears below.
