Tie about 18" of low stretch line to the head of the sail and lead it through the eye on the end cap. Lift the top end of the gaff off the floor. Tension the luff until it draws up to form a nice smooth curve with the luff hanging just under the gaff. It should not be drawn any tighter than is needed to achieve this.

This video explores how halyard position on gaff, gooseneck position on boom, Cunningham, and outhaul can add to sailing pleasure and performance.

Rigging a Sunfish Sailboat Part 2 Rev1 - YouTube

Skippers should always be active in the boat, rarely cleating the main. Downwind in medium and heavy air, heel the boat to windward slightly less than in light air. your control of the boat should dictate the board height. If the boat becomes "squirrely," drop the board a few inches for increased stability.

REPRINTED FROM THE JUNE 1992 ISSUE OF SAILING WORLD ...

The SUPER SUNFISH is a version of the standard SUNFISH offered with an unstayed cat rig. A kit was also available to use on an existing SUNFISH. The idea had developed a few years earlier using a slightly more complex rig (FORMULA 5). AMF adopted this, their own version, which was available for 10 years beginning in 1974.
