"Swimming to the Moon" is a delightful read not only for children, but for the adults who often have to read a book over and over again to the child at the other end of the book. Kids so love to be silly and it reminds us that silly can be good. As I was reading it to a 6 year old, I heard this: " Now wait, what does that mean?"

Floating would feel about the same on the Moon as on Earth, since how high in the water you float depends only on your body's density compared to the water's, not the strength of gravity. Swimming underwater would also feel pretty similar. The inertia of the water is the main source of drag when swimming, and inertia is a property of
