Section III of A Taxonomy for Learning, Teaching, and Assessing: A Revision of Bloom's Taxonomy of Educational Objectives, entitled "The Taxonomy in Use," provides over 150 pages of examples of applications of the taxonomy. Although these examples are from the K-12 setting, they are easily adaptable to the university setting.

Bloom's taxonomy - Wikipedia

Biologists have found their taxonomy markedly helpful as a means of insuring accuracy of communication about their science and as a means of understanding the organization and interrelation of the various parts of the animal and plant world. You are reading about an attempt to build a taxonomy of educational objectives.

Bloom's taxonomy of cognitive learning objectives

BLOOM'S TAXONOMY OF EDUCATIONAL OBJECTIVES Objectives state what we want our students to learn and be able to do. A statement of an objective contains a noun (type of knowledge) and a verb (type of cognitive process using the knowledge).

Bloom's taxonomy of educational objectives

There are three main domains of learning and all teachers should know about them and use them to construct lessons. These domains are cognitive (thinking), affective (emotion/feeling), and psychomotor (physical/kinesthetic). Each domain on this page has a taxonomy associated with it. Taxonomy is simply a word for a classification.
