The Interventional Cardiac Catheterization Handbook

Cardiac catheterization is used extensively for the diagnosis and treatment of various heart disorders. Cardiac catheterization can be used to measure how much blood the heart pumps out per minute (cardiac output), to detect birth defects of the heart, and to detect and biopsy tumors affecting the heart (for example, a myxoma).

Cardiac Catheterization and Coronary Angiography

"The information on management of coronary, carotid, cerebral, and renal disease remains a cornerstone of this handbook. This handbook represents a valuable resource for those new to the catheterization laboratory looking for a firm foundation in the fundamentals and evidence-based medicine." — Nicholas Hanna, MD, Ochsner Clinic Foundation
