The Homebrewers Association estimates that a home brewer would have to make 15 batches per year to break even in the cost per bottle, but most home-brewers are not looking at the break even point, they just want to focus on making their own beer.

How To Make Your Own Beer: A Beginners Guide To Home Brewing

Beer haze it is the stuff of home-brewing nightmares! You have brewed and bottled your beer, it has been chilling in the refrigerator for the last couple of hours and you have your friends waiting to taste this beer that you have been talking about for the last few weeks. You take the beer out of the refrigerator and pop the cap of the bottle.

The Home Brewers Guide to Beer Haze - homebrewtechniques.com

Selecting a Brew Kettle. All-grain homebrewers will need to boil a full volume from the get-go. Plan for the future and buy a kettle that's at least 1.5 times your batch size. For a 5-gallon batch, that means a kettle of at least 7.5 gallons. Going twice as large gives you even more insurance against a boil over.

Extract Brewing 5-Gallon Batch: For this amount of brewing, an 8 gallon kettle will work just fine. It will give you enough space so that it won't boil over, plus it will not take up an entire room in your home. All Grain Brewing 5-Gallon Batch: All-grain brewing needs more space than extract brewing, so you will need a bit of a larger kettle. A 10-gallon kettle will do the trick.
