Alfred Adler
(1870-1937) developed
theories of personality
that focused on a
therapist's need to
understand an
individual within the
context of social
environment.

According to Adler,
character traits and
behaviors derive
primarily from
developmental issues,
including birth order.

The psychological birth of the human infant: Symbiosis and ...

While many consider the 17th and 18th centuries the birth of modern psychology (largely characterized by the publication of William Battle's "Treatise on Madness" in 1758), it was not until 1840 that psychology was established as a field of science independent of
