The Release Technique is the Solution The Release Technique is a highly effective tool for 'releasing' or "letting go" of negativity literally on the spot.

The Release Technique, presented by Larry Crane (a one time friend and student of the method's creator, the late, Lester Levenson), was

ARTs apply cadence and synchronization to help manage the inherent variability of research and development.

However, releasing is typically decoupled from the development cadence. ARTs can release a solution, or elements of a solution, at any time, subject to governance and release criteria.
