“Science is about knowing, engineering is about doing.”-Henry Petroski. The two quotations given above (both taken from our Top 10 Engineering Quotes) succinctly sum up the difference between science and engineering. They reinforce the idea that science is a tool of engineering, but science and engineering each have their own distinct goals.

Though engineering is a science, there are several things that set it apart as a field. 1. Scientists observe the world, while engineers focus on creating. While both fields do involve observation and analysis, engineering mainly deals with creating and working on already existing creations, while scientists work with things in nature.
