Breath Novel**

The second child by
Caroline Bond is an
intriguing tale on many
levels. It looks at family
dynamics of a situation
where babies are
switched in the
hospital nursery at
birth. One is healthy.
The other has
Rubenstein Taiga
syndrome.

I received The Second Child through a book subscription, which I received in July. Its an author I had never heard of but I loved the cover and was definitely intrigued to read. After reading chapter one i could not put it down. It was a compelling, emotional and heartbreaking read.

Step-by-Step Guide to Rescue Breathing

Infant (up to age 1):
Give 2 gentle puffs or breaths of air instead of a deep breath. Each puff is given 2 seconds apart because each gentle breath should last 1 second. If the chest rises, breathe a gentle puff or breathe into the victim's mouth a second time.
