I should first say that while this CAN be read as the first in a series of three, you would really benefit from starting with the very first book of the complete series; Singularity - Heretic. The series started out with books 1 through 4 (now there will be a total of 7 books) but Mr Beers fans wanted more and he decided that there was indeed more to the story.

The Singularity: Traitor, an alternative universe/timeline story by David Beers is an excellent read. It really helps if you have read the first book in the series (The Singularity: Heretic). As before with the first book, you get drawn in from the start. I read Traitor in two days. I couldn't put it down.

The Singularity Is Near by Ray Kurzweil: dislike it (2/5) Too optimistic, too wacky, too wrong. The full title of this book is "The Singularity Is Near: When Humans Transcend Biology," and like its title, the book is verbose and very, very speculative. I know, I know.
