That being said, I have never said that the RG of a bowling ball is more important than the friction created between the cover material and the lane surface. Unfortunately, many bowlers who do not understand the function of the RG take this fact and use it as a reason not to take the time to understand the importance of the radius of gyration.

The Spaces Between | Bowling This Month

The music itself is a combination of styles such as classical/chamber, jazz, ambient, impressionist, all punctured and connected by Surman's horn. Yes, the central song (# 6) is a violin solo, but it's the space between, or reverted peak, two halves of various levels of horn involvement.
