when copying to target.

db2move - Database movement tool command

The VALIDATION_MODE copy option instructs a COPY statement to validate the data to be loaded and return results based on the validation option specified. No data is loaded when this copy option is specified.

Troubleshooting Snowpipe — Snowflake Documentation

If you have visited a site before, a copy of it may exist in the Chrome cache as well. Chrome does not suggest to load it however, even if it does exist. Going through the cache manually may work, but it is far from ideal. Google Chrome does have an option, an experimental one, to load a cached copy of a site that failed to load in the browser.

Load cached website copies in Chrome when loading fails
