Section 13: Problem 4 Solution Working problems is a crucial part of learning mathematics. No one can learn topology merely by poring over the definitions, theorems, and examples that are worked out in the text. One must work part of it out for oneself. To provide that opportunity is the purpose of the exercises.

2 Ex. 13.7 (Morten Poulsen). We know that T 1 and T 2 are bases for topologies on R. Further-more T 3 is a topology on R. It is straightforward to check that the last two sets are bases for topologies on R as well.

Topology by James Munkres, 2nd Edition Solutions Manual. The main solutions manual is solutions.tex.Some solutions have figures, which are done directly in LaTeX using the TikZ and PGFPLOTS packages. The python directory contains some quick and dirty Python scripts that were used to gain insight while working on some of the exercises. These are not documented at all and so probably will not be ...

Section 24 Connected Subspaces of the Real Line A linear continuum is an ordered set such that the least upper bound property holds and for any pair of elements there is another one between them.; A subspace of a linear continuum is connected iff it is a convex subset. Any ordered set connected in the order topology is a linear continuum.
