XenApp and XenDesktop 7.15 LTSR. Cumulative Update 2 (CU2) is the most recent update to the 7.15 LTSR. If you are new to the LTSR program and did not deploy the initial 7.6 or 7.15 LTSR releases, there is no need for you to install either now. Instead, Citrix recommends that you begin right with 7.15 LTSR CU2.

I have Xenapp/Desktop 7.15ltsr and have a single server that I need to have a separate app run on, but I would like to make that app available on my regular Xenapp farm where I publish desktops. I found an article that talked about how to do this with 6.5... Is there an easy way for me to do this...
